RECOMMENDS CITY NORMAL SCHOOLS,

Instruction Committee Favors Separate Building for Training St. Louis Teachers.

TO OPEN McKINLEY SCHOOL.

Board Will Arrange for Pupils to Visit the World's Fair With Their Teach-

At a meeting of the Instruction Committee of the Board of Education yester-day afternoon it was recommended that the \$39,000 appropriated some time ago by the Finance Committee for building a

normal school, be accepted.

It was also recommended that this school be built on the site, purchased for the purpose about a year ago, at the southwest corner of Park and Teresa avenues. The site is adjacent to the Wyman School, which will be a practice school for young teachers.

Although the project of building the Normal School as an independent educa-tional feature of the St. Louis public school system has the support of the Finance and Instruction committee and of the Superintendent of Instruction, it is believed that the plan will be opposed at the next meeting of the board on Tuesday night.

Some of the board members are known to favor the State Normal plan, having the leaving of the Illinois Central train spoken in favor of a State school at the south, to enable a much harassed bride last meeting, and, although it is said that and groom to escape the well-meant efthere is no hard feeling between the forts of their friends. next meeting prepared to debate in favor of a State normal school.

The Instruction Committee also reported that it would be advisable to open the Mickinley High School on February 1. Two floors will be ready by that time and by March 1 the entire building will be ready for occupation.

The new Blow School building will be ready for occupancy on March 1.

The World's Fair, as an educational feature for children, was discussed by the committee at length yesterday, and it was recommended that the teachers be allowed to take classes to the various exhibits during the World's Fair period.

A subcommittee was appointed to make arrangements with the World's Fair officials for a cut-rate admission and other facilities.

ARRANGE FOR MEETING OF CO-OPERATIVE UNION.

Delegates Will Attend From All Parts of the United States

Arrangements are being made for the reception of the National Co-Operative Union, which will convene in this city in 1904, during the third week of June. N. O. Nelson has received word to that effect, and in his capacity as a member of the Co-Operative Association has taken the affair in hand.

It is estimated that there will be from 300 to 500 members present. They will come from the European Continent, where the co-operative movement has a very strong following, and from different sections of

The Co-Operative Association advocates principally the theories and the workings of the Rochdale movement, which was in augurated in 1844 at Manchester, England, by twenty-eight textile workers, who started with a capital of \$125, which has been increased to \$175,000,000 since that

Owing to the unsettled conditions exist ling between labor and capital and between employer and employe in this country the co-operative idea has not met with the same encouragement as it has in England and Europe, where the unions not only own their stores, but also their factories, mills and transportation lines.

The essential principle of the movement is the idea of profit-sharing among the members. Each member of the union is entitled to purchase from the Rochdale stores at the regular retail price. At the end of each year the profits of the organization, less the expenses, are equally divided among the shareholders.

The wholesale stores and the factories are conducted on the same principle, but they, instead of having individual persons for members, have the retail stores, to whom they return the profits, which revert to the original shareholders. ing between labor and capital and between

A REED SHAKEN WITH THE WIND.

Without Will Power, Courage, Ambition, Energy or Hope, the Dyspeptie is Willing to Give Up the Struggle.

The confirmed dyspeptic has as little interest in life as any human being. He is unfitted for its duties and is indifferent to its charms. He is unable to enjoy the business and social relations that constitute the life of the average man. All his hopes are absorbed by the one hope to get well and again be able to enjoy the good things of life. Until this is realized, he is sick at heart and feels himself to be of little use.

Stuart's Dyspepsia Tablets are the sufferer's tree of life. They will cure him and bring him health and happiness just as sure and certain as he takes them.

feret's tree of life. They will cure him and bring him health and happiness just as sure and certain as he takes them. They are sure because they are natural and no other cure but a natural one is cure. They act on the food and digest it just as well as a stomach would. They contain exactly the same chemical properties as the digestive fluids of the stomach. By putting Stuart's Dyspepsia Tablets in a bottle or jar with any kind of food, meat, eggs or vegetables, with sufficient amount of water, the process of digestion is carried out just as it is in a healthy human stomach and in the same time. There is consequently no unnatural disturbance of the digestive organs resulting from the use of Stuart's Dyspepsia Tablets. They relieve the weak and worn-out stomach of its work and permit it to rest up and recuperate and regain its normal health and strength.

A well-known Buffalo physician says: "I prescribe Stuart's Dyspepsia Tablets on all occasions as a relief for weakened and run-down stomachs. I find they contain all the ingredients necessary for the proper digestion of the food and will do more to give the stomach the needed rest than any medicine I could prescribe. They have never failed to give immediate relief in all my cases and I do not hesitate to recommend them to all sufferers from dyspepsia."

Stuart's Dyspepsia Tablets are for sale

by all druggists at 50 cents a box.
